DESCRIPTION OF CONVERSATION

I spoke with Mr. Richardson on January 31, 2000 regarding the use of zinc/ iron crystals in the manufacture of fertilizers. During that conversation, I asked Mr. Richardson to see if any zinc/ iron crystals were still in storage. Mr. Richardson informed me that there were no longer any crystals in storage.

To show that this issue had been resolved, I asked Mr. Richardson to send a letter to the EPA explaining that the granulation plant had ceased operating, and that Nulex was no longer handling or storing any zinc/ iron crystals.
